

DRAMSCO™ EXCHANGE

The global floor for commodities, remittances, metals and capital

Investor & Media Brochure

A 24/7/365 institutional trading floor: 23 carat gold fixing, multi-format metal auctions, AI-captured forex differentials shared with clients as Revshare™ Savings, global remittance, digital contracts and independent licensed settlement.

Why Dramasco exists

Global commodity and remittance flows still leak value at the edges: opaque bullion pricing, bilateral metal deals with no auction discovery, and forex corridors where the spread between official and street rates is captured entirely by intermediaries. Dramasco™ Exchange rebuilds that value chain on a single floor — and returns a defined share of the captured differential to the client.

THE REVSHARE™ PRINCIPLE

Our engine reconciles dual official and parallel-market feeds sub-second, 24/7/365. On every eligible corridor, 30% of the captured differential is printed to the client as Revshare™ Savings — visible before the transaction, locked at the point of pay and honoured at payout.

FOUR REVENUE ENGINES

Metals & bullion

Dedicated 23 carat gold desk with twice-daily fixing (10:30 AM / 3:00 PM US Eastern). English, Dutch and sealed-bid auctions across precious, base and rare-earth metals with a 90% reserve floor tied to daily pricing.

Energy

Daily pricing and structured trading in crude and refined product, executed against SPA, NCNDA and IMFPA papers signed in-platform.

Remittance & forex

60+ corridors across bank, card, PayPal, mobile money and multi-currency wallets, with sanctions screening refreshed from official lists daily.

Capital & paymaster

100% capital-preservation mandates benchmarked to money-market rates, paymaster escrow, desk limits and T+0 primary settlement.

Built like an exchange, not a website

Live market data

Streaming price boards, tickers and world-clock desk hours in US Eastern, with charted differential trends for every major currency against the Naira.

Auction engine

Three auction formats, real-time bid listeners, assay and inspection documents attached to each lot, escrow instructions and a published settlement window.

Digital contracts

SPA, NCNDA, IMFPA and Paymaster/Escrow agreements drafted, signed and executed in-platform; every signature carries a SHA-256 certificate serial.

KYC / AML

Side-specific buyer and seller onboarding, document and ID capture, sanctions and PEP screening, and an auditable receipts ledger.

Digital asset desk

24/7 crypto buy and sell with SHA-256 step-up authentication at every sensitive action.

Global reach

Full-app translation across 30+ major languages so a counterparty can price, bid and settle in their own language.

TECHNOLOGY POSTURE

- Edge-rendered React application with server-side rendering for instant first paint and maximum search visibility.
- AI differential capture running continuously with reconciled dual feeds, rate locking and payout-point revalidation.
- Row-level-secured database, encrypted document storage and least-privilege server functions.

Compliance is the product

Where required, transactions on Dramasco™ are performed by licensed banks, financial institutions, licensed escrow agents, licensed vaults, and independent compliance and regulatory officers who are not staff of GOLDSTONE GLOBAL INVESTMENTS. That separation is deliberate: discovery, custody and settlement never sit in the same hands.

Independent counterparties

Licensed banks, escrow agents and vaults execute custody and settlement.

Sanctions hygiene

Country and entity screening refreshed daily from official published lists; sanctioned jurisdictions are removed automatically.

Auditable trail

Every contract, bid, receipt and payout carries a certificate serial and timestamp.

Dispute desk

A standing dispute and resolution channel with independent regulatory review.

WHO WE BUILD FOR

- Institutional and family-office allocators seeking capital preservation with disclosed benchmarks.
- Refiners, traders and off-takers who need price discovery instead of bilateral negotiation.
- Diaspora and corporate remitters who want the differential shown, shared and locked.
- Media, analysts and technology partners covering the digitisation of physical commodity markets.

Open the floor

The floor is open 24 hours a day, 365 days a year. Onboarding is digital end to end: register, complete KYC and AML, sign your mandate papers, fund escrow, and desk limits are issued.
